VIDICTO[®]
FOR YOUR EYES ONLY

Critical Protection.

VIDICTO is a video conferencing solution developed in Germany that not only promises protection against eavesdropping and data sovereignty, but also enforces it through its architecture.

-  True end-to-end encryption
-  In-session key exchange (post-quantum secure)
-  Highly encrypted video, audio, messaging, and file transfer
-  No cloud dependency
-  Protection against unauthorized access
-  BSI-aligned security architecture
-  Multi-tenancy and network segmentation capabilities
-  Authenticated participants and groups in highly secure environments
-  Configurable open and closed groups
-  Encrypted recording only with the consent of all participants
